1. EXECUTIVE SUMMARY

- **Global Expansion of Blockade:** The United States has significantly broadened its naval blockade against Iran, authorizing U.S. forces to board, search, and seize any Iran-linked or sanctioned vessels on the high seas worldwide, moving enforcement far beyond the immediate Gulf region.
- **Targeting the "Shadow Fleet":** The new directive specifically targets all Iranian-flagged ships, vessels with active OFAC sanctions, and Iran's "shadow fleet" of over 500 tankers used to bypass sanctions.
- **Broader Definition of Contraband:** The U.S. has expanded the definition of contraband to include "conditional contraband" - dual-use goods such as petroleum, industrial materials, machinery, and electronics- if they are deemed to support Iran's military or war-sustaining economy.
- There are currently (April 17th, 2026) over 177 vessels carrying Iranian Cargo on board globally, mostly destined to China, India, Singapore and others. Nearly 700 Iranian Dark Fleet vessels are located by Windward operating globally, and there are dozens of vessels internationally trading within the Gulf at the moment, possibly carrying Iranian cargo.

2. IRANIAN CARGO ON WATER

CARGO DESTINATION:

Based on Windward data, maritime traffic is heavily concentrated in Asian and Middle Eastern markets. China and the United Arab Emirates are the leading national destinations, accounting for a significant portion of the recorded fleet movement. Notably, a large number of vessels are currently in transit with unspecified final destinations (designated as "FOR ORDER" or "TO ORDER").

BANDAR IMAM KHOMEINI PORT AND ANCHORAGE ANALYSIS:

The Imam-Khomeini Port is one of the main Iranian ports for importing mostly Agricultural cargo, General cargo, and Grains. Commercial Vessels in that port and in its Port Waiting Area and/or vessels bound to that port might carry an elevated risk for carrying an Iranian Cargo.

As of April 17th, 2026, there are 35 AIS transmitting vessels within the Imam-Khomeini Port and Port Waiting Area.

Windward Multi-Source Intelligence Capabilities detected 88 Vessels within the Imam Khomeini port and port waiting area, among them - 8 Dark General Cargo Vessels and 2 Dark Tankers, the remainder were smaller service boats and small Wooden boats.

See the image below of the only 2 potentially international trading vessels detected in the Imam Khomeini while dark. (2 Tankers - 180 and 185 meters) Seemed to be heading outbound from the port.

Figure - 2 Dark Tankers, potentially internationally trading, heading out of the port - Possibly towards exiting the Gulf) - April 17, 2026, 05:06 UTC, Windward | Vantor

KHARG ISLAND PORT AND ANCHORAGE ANALYSIS:

Note: This is Iran's main export loading hub for crude oil. Most tankers calling at this terminal switch off AIS. STS transfers also occur while vessels are dark.

Maritime Activity in Kharg Island Region – 16th April 2026

Date/Time: 16th April 2026, 07:22 UTC

Location: Kharg Island Region

Vessel Observations:

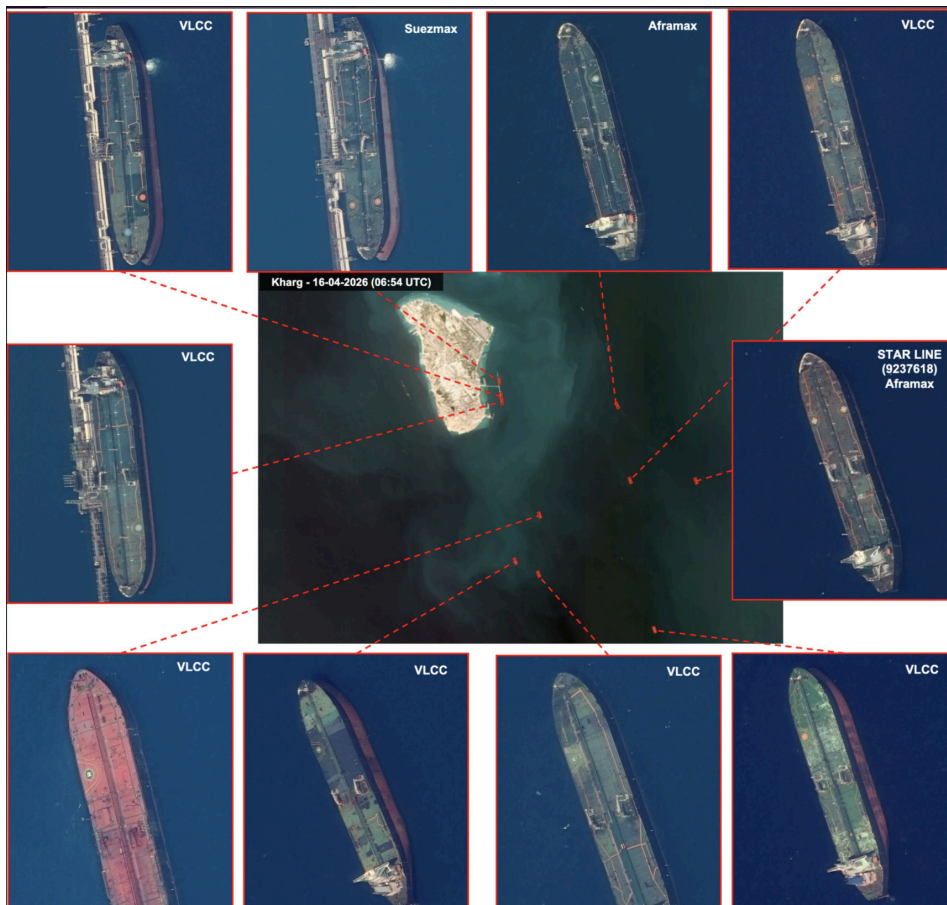

- A Vantor image from the Kharg Island region reveals the presence of 7 VLCCs, 1 Suezmax, and 2 Aframax vessels.
- 1 Aframax vessel transmitting an active AIS signal, likely to be STAR LINE (IMO 9237618), flagged under Curacao (fraudulent).

Port Operations:

- 3 vessels are currently loading at the eastern terminal: 2 VLCCs, 1 Suezmax
- Note: All are new loads as of April 13 - assessed together as 5M bbl.

Additional Notes:

- The VLCC previously observed at the eastern terminal on the 13th (identified as the AQUA) has now departed, as indicated by visual inspection. This vessel exhibited a red deck, differentiating it from the 3 vessels currently loading, which all display a green deck.
